

Diversity

The Institute for Advanced Study is committed to diversity and strongly encourages applications from women and minorities.

For more information, please see the following link for our Park City Mathematics Institute summer activities (<http://pcmi.ias.edu>). The Diversity Subcommittee of the IAS/Park City Mathematics Institute (PCMI) advises the PCMI Steering Committee on ways to increase full participation of under-represented minorities in the undergraduate, graduate, secondary school teacher, undergraduate faculty, and research programs, consistent with overall program goals. The committee seeks to specify strategies and develop recruitment models in order to increase successful minority participation in PCMI's programs.

Also please see information about our Women and Mathematics program (<http://www.math.ias.edu/wam>).
