

## remote access

### Network/Internet

**ssh** and **scp** are the only services running for remote access to the mathematics servers.

These services may only be used on **remote.math.ias.edu** or **ssh.math.ias.edu**

[Using scp to copy files to and from the Institute](#)

[Using ssh to access the Institute Servers](#)

Ssh clients are available for:

Windows

Macintosh

Linux

Solaris

[Housing Ethernet](#)

To receive an ethernet (high-speed internet) connection in your institute apartment, please register [here](#).

---

### Modem/Dialup

**Modem/Dialup Access is no longer supported at the Institute. Members are encouraged to use the housing ethernet connection for home access. Dialup service was decommissioned August 15th, 2001. If you still wish to use a modem, we suggest using an alternative provider such as AT&T Worldnet, CompuServe or AOL.**
