

Mathematics Software

Magma

On the Linux Servers: miami, minsk, dublin or ssh

On a command line, type:

magma

On the Windows server: kobe

In the start menu, go to: All Programs->Magma->Magma

Maple

On your Linux Workstation:

On a command line, type:

maple

or:

xmaple

Or in the start menu, go to: Mathematics->Maple

or:

Mathematics->Xmaple

Mathematica

On your Linux Workstation:

On a command line, type:

mathematica

Or in the start menu, go to: Mathematics->Mathematica

Mathematics Software

On your personal machine:

If you are using Mathematica on campus through the site license, you can request a home-use license for your personal machine here:

<http://url.wolfram.com/45LiTeg/>

You'll need your organization's site license number, which you can get from your on-campus installation of Mathematica (select "Help" > "About Mathematica")

Matlab

On your Linux Workstation:

On a command line, type:

matlab

Or in the start menu, go to: Mathematics->Matlab

On the Windows server: kobe

In the start menu, go to: All Programs->MATLAB->R2008b->MATLAB R2008b

Sage

Sage is an open source alternative to Magma, Maple, Mathematica and Matlab.

On your Linux Workstation:

Run 'sage' on the command line
