

Workshop on Non-equilibrium Dynamics and Random Matrices

Monday, November 4, 2013 - 09:00 - Friday, November 8, 2013 - 12:00
2013-2014

November 4-8, 2013

This workshop is part of the topical program "Non-equilibrium Dynamics and Random Matrices" which will take place during the 2013-2014 academic year at the Institute for Advanced Study.

The workshop aims to provide a broad survey of the current status of Non-equilibrium Dynamics and Random Matrices. The main topics addressed in this workshop are the mathematical foundations of random matrix theory and the random Schrodinger equation, and the applications of random matrix theory to physics, combinatorics, and engineering.

Organizers:

The workshop is organized by Yan Fyodorov (Univ of London), Herbert Spohn (TUM/IAS) and Horng-Tzer Yau (Harvard/IAS).

Agenda: (TBA)

Registration: (TBA)

Registration for the meals and workshop is required. (Speakers do not need to register.)

Although there is no registration fee, because seating is limited both in the seminar room and in our dining hall, you are required to register if you wish to attend all or part of the workshop. In addition, in order for our chef to prepare enough food, we need to have a headcount for the meals. Please note the workshop attendees are expected to pay for their lunch. Approximate range of prices is \$4.00 for a salad to \$9.00 for an entree. Vegetarian lunches will be available. Only cash is accepted at the cash registers. Credit cards and personal checks are not

accepted.

Transportation and Housing:

Information regarding transportation and accommodations in the Princeton area can be found at www.princetonol.com. Please note that if you are staying on Route 1 you should inquire whether the hotel has a shuttle service to and from the IAS.
